

Providing LP and Natural Gas Parts For Over 50 Years!

Thermocouples & Thermopiles

Pilots & Flame Sensors

Ignitors

Ignition Modules

Commercial Cooking

Residential Cooking

Hearth & Space Heating Parts

Mobile Home & RV Parts

Heating Valves & Furnace Parts

Fan & Limit Controls

Wall Thermostats & Transformers

Water Heating & Pool Heating Parts

Dryer Parts

Regulators & Solenoid Valves

Orifices - Brass Fittings - Gas Connectors

Installation Materials - Test Equipment - Tools

controlsinc.

Controls Inc. has been serving the gas community as a premier parts distributor for over 50 years, offering parts and technical support for most major brands of commercial and residential gas appliances and heating equipment.

This catalog offers an in-depth view of the most common replacement parts found in gas appliance repair. Be sure to keep it handy for quick and easy identification of the parts you may come across in the field.

Whether you need assistance with parts identification, obtaining pricing and availability, or placing an order... We are just a phone call or email away!

PLEASE NOTE: If calling to locate a part or for technical assistance, please be sure to have the Brand Name, Model, and Serial Number of what you are working on in hand so that we can better assist you.

We look forward to hearing from you!

Phone: (800)334-5886

Fax: (888)783-0239

THERMOCOUPLES & THERMOPILES

- THERMOCOUPLES (3-6)
- HIGH LIMIT LEAD WIRES (5)
- ECO ADAPTORS (5)
- THERMOCOUPLE ADAPTORS (5)
- THERMOPILES (7)

3

PILOTS & FLAME SENSORS

- MULTI-USE PILOTS (8-14)
- HEATING PILOTS (14-17)
- WATER HEATER PILOTS (18)
- POOL HEATER PILOTS (18-19)
- COOKING PILOTS (19-21)
- COOKING TOP PILOT LINES (20)
- FLAME SENSORS (21-22)

8

IGNITORS

- HEATING IGNITORS (23-24)
- COOKING IGNITORS (25-26)
- PIEZO IGNITORS (26)
- WATER HEATER IGNITORS (27)
- POOL HEATER IGNITORS (27)
- DRYER IGNITORS (28)
- IGNITOR KITS (28)

23

IGNITION MODULES

- HEATING MODULES (29-33)
- COOKING MODULES (34)
- WATER HEATER MODULES (35)
- POOL HEATER MODULES (35)
- PILOT RELIGHT KIT (36)
- IGNITION WIRES (36)

29

COOKING

COMMERCIAL (37-58):

- GAS VALVES & SAFETY VALVES (37-42)
- TOP BURNER VALVES (42)
- THERMOSTATS & LIMIT SWITCHES (43-49)
- PILOTS (50)
- TOP PILOT LINES (51)
- FLASH TUBES & CHARGE PORTS (51)
- PILOT ADJUSTMENT VALVES (51)
- IGNITORS (52)
- IGNITION MODULES (52)
- KNOBS & ADAPTORS (53-56)
- TOGGLE & ROCKER SWITCHES (56)
- MISCELLANEOUS PARTS (56-57)
(SPRINGS, BURNERS, & MORE)
- T&S BRASS KITCHEN FIXTURES (58)

RESIDENTIAL (59-65):

- OVEN SAFETY VALVES (59-60)
- BURNER VALVES (61)
- THERMOSTATS & RANGE CONTROLS (61)
- IGNITORS (62-63)
- IGNITION MODULES (63)
- PILOTS & THERMOCOUPLES (64)
- BURNERS (64)
- REGULATORS (65)
- KNOBS (65)

37

HEATING

- HEARTH & GAS FIREPLACE PARTS (66-73)
- SPACE HEATING & FURNACE PARTS (74-88)
- MOBILE HOME & RV PARTS (89-91)
- HEATING GAS VALVES (92-102)
- FAN & LIMIT CONTROLS (103-106)
- TRANSFORMERS (107-108)
- WALL THERMOSTATS (109-112)

66

WATER HEATERS & POOL HEATERS

WATER HEATER PARTS (113-115):

- PILOTS (113)
- IGNITORS & FLAME SENSORS (114)
- IGNITION MODULES (114)
- PRESSURE SWITCHES (115)
- MISCELLANEOUS PARTS (115)

POOL HEATER PARTS (116-120):

- GAS VALVES (116)
- THERMOSTATS & TEMPERATURE CONTROLS (117)
- IGNITION MODULES (117)
- IGNITORS (118)
- PILOTS (118)
- LIMIT SWITCHES & TEMPERATURE SENSORS (119)
- PRESSURE SWITCHES (120)
- MISCELLANEOUS PARTS (120)

113

DRYERS

- IGNITORS (121)
- FLAME SENSORS (121)
- COILS (121)
- THERMAL FUSES (121)

121

REGULATORS & SOLENOID VALVES

- APPLIANCE REGULATORS (122, 126)
- SERVICE REGULATORS (123-124, 126)
- VENT LIMITERS (125)
- VENT PROTECTORS (125)
- VENT COVERS (CAPS) (125)
- SOLENOID VALVES (127-128)

122

ORIFICES & FITTINGS

- PILOT ORIFICES (129-130)
- BURNER ORIFICES (131-132)
- ORIFICE KITS (130, 132)
- BRASS FITTINGS (133-135)

129

INSTALLATION / TEST EQUIPMENT / TOOLS

- BALL VALVES (136)
- GAS CONNECTORS (137-138)
- ALUMINUM TUBING (138)
- TUBING CUTTERS (138)
- TUBING BENDER (138)
- FLARING TOOLS (138)
- DRILL KITS (139)
- PIN VISES & BROACHES (139)
- ORIFICE SPUD KIT (139)
- ORIFICE PUMP (139)
- LEAK DETECTORS (140)
- PRESSURE TEST KITS (140)
- MANOMETERS (141)
- MULTIMETERS (142)
- COMMON SERVICE MATERIALS (143-144)
- THERMOMETERS & GAUGES (144)
- GAS TIMERS (145)
- INFINITELITE® GAS LIGHTER (145)

136

TECH RESOURCES

- ORIFICE CAPACITIES CHART (146)
- PIPE SIZE IDENTIFICATION (147)
- MILLIVOLT FRYER WIRING DIAGRAMS (148)
- RESIDENTIAL RANGE SAFETY VALVE & IGNITOR TROUBLESHOOTING (149)
- DRYER COIL TROUBLESHOOTING (150)
- BJ THERMOSTAT INSTRUCTIONS (151)

Q314A Pilot Burner

Nonprimary-aerated, insert orifice-type pilot burner for main burner ignition with Q340 thermocouple or Q313 thermopile.

Q314A3547
A Type Bracket

Q314A4586
B Type Bracket

Order No.	Tip Style	Type Gas	Mounting Bracket	Includes:
Q314A3547		NAT	A	1/4" cc inlet fitting. For LP, order 390686-1 orifice.
Q314A4586		NAT/LP	B	1/4" cc inlet fitting. Special mounting bracket with screws for converting "B" bracket to "A" bracket.
Q314A6094		NAT/LP	B	
Q314A6102		NAT/LP	B	

Q327A Pilot Burner

Order No.	Description
Q327A1626	B Type Mounting Bracket NAT and LP Orifice Included Target Span - 1"

Q345A Ignitor/Sensor

Nonprimary - aerated combination pilot burner and igniter. Used in intermittent pilot systems.

- Includes pilot burner with bracket, ceramic-insulated Kanthal flame rod/spark ignitor, and ground strap.
- For LP, order 390686-25 orifice.

Q345A1305

Universal 2BLC Pilot

1810-100

1810-308 Pilot

1810-308

1819-001 Quick Drop-Out Pilot

The quick dropout pilot assembly is designed for those applications that require a quick dropout of the safety magnet when pilot flame is lost.

Specifications:

- Uses 1/4" Tubing
- Two-lead 24" Thermopile
- Lo-mass 18" Thermocouple
- Electrode w/ 18" Leads
- Includes **Nat** and **LP** orifices

1819-001

Order No.	Description
1810-100	1/4" & 3/16" Tubing Nat/LP

Order No.	Description
1810-308	1/4" Tubing .010 LP Orifice Included

Order No.	Description
1819-001	Complete Pilot Assembly
1960-027	Replacement Thermocouple
1950-001	Replacement Thermopile

1820 Pilot Uni-Kits

Replacement for ITT PG9 type pilots with a 32" thermopile.
- **NAT** and **LP** orifices included.

1820-009

Order No.	Flame Pattern	Description
1820-009	90° Right	With Thermopile
1820-019	90° Left	With Thermopile
1820-029	90° Right	Pilot Only
1820-039	90° Left	Pilot Only

10-114

1810, 1819 & 1820 Replacement Orifices:

Order No.	Gas	Size
10-114	LP	.010
10-211	LP	.011
10-021	NAT	.018

Y75 Replacement Flame Sensors

Y75 Flame Sensors may be used to replace sensing probes in G60, G65, G67, G600, G670, or G770 electric ignition control systems.

These replacement probes must **not** be used for new field applications. They can be trimmed to the proper length of the Y75 being replaced. Packed two sensors per bag.

Order No.	Connector Style	Locating Dimension
Y75AS-1	90° Male Spade	0.34 In
Y75AS-2	Straight Male Spade	0.34 in
Y75BS-1	Straight Male Spade	0.57 in

10-760 Flame Sensor

The flame sensor has a high temperature Kanthol sensor rod that will withstand 1800°F. Sensor rod is 4" long and can be cut and bent to match original unit.

Order No.	Lead Length	Connector Style
10-760	30"	1/4" Female Quick Connect

41-400 Series Hot Surface Ignitors - 110 Volts

The 41-400 Series Ignitors deliver dependable ignition in heating system; from furnaces and boilers to rooftop heaters, infrared burners, unit heaters, water heaters, and many other types of HVAC equipment. They are designed to reach ignition temperature within 17 seconds.

Ignitor Identification

In order to select the correct replacement ignitor:

1. Match the Ceramic Block Style
2. Match the Terminal Connector Style
3. See below for correct part number.

Terminal Connector Style

Ceramic Block Styles

Order No.	Factory Model	Ceramic Block	Terminal Connector	Lead Wire

F767 Hot Surface Ignitors - 110 Volt

The White-Rodgers F767 is a highly reliable ignitor because it provides a much larger surface area to ignite the gas. It can be used with either a 15, 17, or 45 seconds warm up time system. All replacements have 9" leads rated at 482° (250°C).
Electrical Rating: 120v AC, 60 Hz, 5.0 amps.

HEATING MODULES

S87 Direct Spark Ignition Modules

Provide electronic control of direct spark ignition systems used on gas fired furnaces, boilers, and other heating appliances.

- Lockout after one trial for ignition if main burner fails to ignite.
- Reset from thermostat after lockout.
- Use modules (except S87C) with any combination gas control designed for direct spark applications and rated at 2.0A or less.

Order No.	Lockout Timing	Application	Use With:
S87B1024 S87B1065	21 sec. 4 sec.	Uses a single electrode for spark ignition and flame sensing. Includes optional alarm output.	Q347A Spark Ignitor
S87C1006 S87C1030	6 sec. 21 sec.	Uses separate electrodes for spark ignition and flame sensing. For use only with Honeywell gas controls designed for DSI application.	Q347A Spark Ignitor and Q354A Flame Sensor
S87D1004 S87D1012 S87D1020 S87D1038	6 sec. 11 sec. 4 sec. 21 sec.	Uses separate electrodes for spark ignition and flame sensing. Includes optional alarm output.	Q347A Spark Ignitor and Q354A Flame Sensor
S87J1034	21 sec.	Uses a single electrode for spark ignition and flame sensing.	Q347A Spark Ignitor

S87B1065

S89 Direct Spark Ignition Modules

Provide electronic control of direct spark ignition systems with spark transformers. Used on gas-fired furnaces, boilers, conversion burners and other heating appliances.

- Lockout after one trial for ignition if main burner fails to ignite.
- Reset from thermostat after lockout.
- Use separate electrodes for spark ignition and flame sensing.
- Use any 24 Vac combination gas control designed for direct spark applications and rated at 2.0A or less.

Order No.	Lockout Timing	Application	Use With:
S89E1058	4 sec.	For use in direct spark ignition systems on gas-fired atmospheric and power burners. Provides safe start check before ignition.	VR845, VR854, VR8450, VR8540, VR8205 or VR8305 Combination Gas Control, or any dual valve rated 2.0A or less for DSI application.
S89F1098 S89F1106*	4 sec. 4 sec.	For use in direct spark ignition systems on gas-fired atmospheric and power burners. Provides safe start check and 30 second purge period prior to ignition.	Q347A Spark Ignitor and Q354A Flame Sensor

* Label applied upside down for inverted mounting.

S89F1098

S8910U Universal Hot Surface Ignition Module

Provides electronic control of a direct ignition system using a 120 Vac hot surface ignitor.

- Provides easy field-replacement of a wide range of hot surface ignition modules manufactured by Honeywell, Robertshaw and White-Rodgers.
- For 120 Vac (up to 5.0A) hot surface ignitor (Norton 210/271 or equivalent).
- For local (single rod) or remote (dual rod) rectification type flame sensing.
- Contains easy-to use instructions plus the accessories required to adapt the existing hot surface ignition module.

TEMPERATURE RATINGS: Ambient: -40°F to +175°F (-40°C to +79°C)

SENSOR: Separate sensor required for remote sensor application

ELECTRICAL RATING: Power supply: 24V, 60 Hz.

Valve Contacts: 2A max.

Hot Surface Ignitor Voltage: 120 Vac, 60 Hz.

PREPURGE: 32 seconds.

BETWEEN TRIAL PURGE: 96 seconds (3 trial mode only).

FLAME FAILURE RESPONSE TIME: 1.5 seconds maximum.

IGNITION SEQUENCE: The number of trials for ignition and trial time is determined by the selection tab. If a selection tab is not installed, the module will operate at four seconds trial time and one ignition trial.

S8910U3000

Order No	Prepurge Time
S8910U3000	32 Seconds

S89C Hot Surface Ignition Module

Provides electronic control of 120 Vac hot surface ignition systems used in furnaces, boilers and other heating appliances.

- **S89C is for systems with combination ignitor-sensor.**
- Use with Norton 201 Hot Surface Ignitors or equivalent.
- Lockout after one trial for ignition if main burner fails to ignite.
- Reset from thermostat after lockout.

Order No.	Lockout Timing	Application
S89C1087	6 sec.	For use in hot surface ignition systems to control hot surface ignitor and flow of gas in appliances. Provides single trial for ignition.

S89C1087

S8610U Universal Intermittent Pilot Module

Field service replacement for most Honeywell, Robertshaw, Johnson, and UTEC intermittent pilot ignition modules.

- Provides ignition sequence, flame monitoring and safety shutoff for intermittent pilot central furnaces and heating appliances.
- Provides 100 percent pilot gas shutoff if pilot fails to light; after 6-minute delay, trial for ignition is repeated. Ignition trial/delay sequence is repeated until the appliance lights or call for heat is removed.
- For use with Natural or LP gas.
- Functional equivalent of S86, S8600, S8610 and S90 Modules.
- Includes cable adapters to allow field replacement of both Honeywell and competitive controls without replacing existing cable.

Order No.	Lockout Timing	Application
S8610U3009	90 sec.	For use in single rod or dual rod/remote sense applications.

S8610U3009

780 Direct Spark Ignition Modules (DS845)

DS845 Series Direct Ignition Controls are applicable to commercial cooking equipment, gas-fired heating and water heating systems of many types.

Order No.	Factory No.	Pre-Purge	Non-Pre-Purge	Remote Sensor	Local Sensor	Ignition Attempts (Before Lockout)	Valve Trial Time (sec.)	Supply Voltage
780-502	100-00832-13 DS845-NL-1-4		•		•	1	4	24 VAC

780-501

780 Hot Surface Ignition Modules (HS)

The 780 Hot Surface Ignition Module is designed for use on gas-fired heating systems.

Order No.	Factory No.	Pre-Purge	Non-Pre-Purge	Remote Sensor	Local Sensor	Ignition Attempts (Before Lockout)	Valve Trial Time (sec.)	Supply Voltage
780-783	HS-34PL-308A	•			•	3	8	120 VAC
780-785	HS780-34NL-306A		•		•	3	6	120 VAC
780-790	HS780-17NL-304A		•		•	3	4	120 VAC

780-783

780-845 Intermittent Ignition Module (SP845)

Provides 90 seconds of spark, followed by a 6 minute time delay (purge) between ignition attempts. After three tries, if no pilot flame is sensed, the control goes into a one hour lockout period. At the end of the lockout period, if the demand for heat is still present, the unit will repeat three tries for ignition.

NOTE: During lockout, you may override the auto-system and manually reset the unit at the thermostat.

Specifications

Input Voltage:	24 VAC to 50/60 Hz
Transformer:	24 VAC/20 VA
Safety Lockout Timing:	90 seconds
Flame Failure Reignition Time:	2 seconds maximum
Ambient Temperature Rating:	-40° to 175°F (-40° to 80°C)

Order No.	Factory Model	Description
780-845	SP845NU-3-C	Universal lockout module has three 90 second trials interrupted by a 6 minute purge cycle before 100% lockout

780-845

* Module has green diagnostic LED light to indicate normal operation or if failure occurs.

780-002 Universal Ignition Module (SP845)

Features a lockout feature to shut off all gas to the furnace should pilot ignition fail to occur after 3 tries. Each ignition period is 90 seconds followed by a 6 minute time delay between ignition attempts. After 3 tries if no pilot flame is sensed, unit goes into lockout and must be reset at the thermostat.

Also features a flame sense circuit that will work equally well on a one rod (local sense) or a two rod (remote sense) application. Includes vent damper adaptor assembly.

Specifications

Input Voltage	24 VAC to 50/60 Hz
Transformer	24 VAC/20 VA
Flame failure reignition time:	8 seconds maximum
Ambient Temperature Rating:	-40° to 175°F (-40° to 80°C)

Order No.	Factory Model	Description
780-002	SP845	Lockout Universal Ignition Module

780-002

780-715 Non-Lockout Module (SP715)

Non-Lockout ignition module for NATURAL GAS ONLY. Features a flame rectification system. Use with gas valves 7000BDER, 7100DER, and 7200IPER. Replaces SP715 and SP715A.

Order No.	Factory Model	Description
780-715	SP715U	Non-Lockout. Natural gas ONLY.

780-715

50E47 Universal Hot Surface Ignition Module (Non-Integrated)

The universal non-integrated 50E47-843 replaces all White-Rodgers 50E47 Modules. For use with all gases on single stage applications. Includes program keys for multiple timing selections and tri-colored LED indicator for diagnostics.

TEMPERATURE RATINGS:

Ambient: -40°F to + 175°F (-40°C to + 79°C)

SENSOR:

Direct and Indirect Flame Sensing Options. Includes jumper to accommodate systems using Direct (sensing through the ignitor) or Indirect (sensing through a flame sensor).

ELECTRICAL RATING:

Input Voltage: 18-30 VAC 60 Hz.

Valve Contacts: 1.5 amp @ 25 VAC 60Hz

Hot Surface Ignitor Voltage: 6.0 amp @ 120 VAC, 60 Hz

Order No.	Lockout Time	Ignitor Warm Up Time	Pre-purge Time	Retries
50E47-843	4 or 7 Sec.	17 or 45 Sec.	30 Sec.	0 or 2

50E47-843

50A55 Universal Integrated Furnace Control

Controls gas valve, ignitor, blower, inducer, humidifier and air cleaner. For use with single stage applications. Replaces most 50A50 and 50A55 modules.

- Includes flash code diagnostics
- Includes mounting hole template
- Adjustable blower relay

Order No.	Pre-purge	Retries	Trial for Ignition Period
50A55-843	30 Sec	2	4 Sec.

Miscellaneous

785 Series - Automatic Pilot Relight Kits

Designed for use on rooftop heating equipment, water heaters, boilers, space heaters, unit heaters, dryers, and other commercial, industrial, and residential appliances where the problem of pilot outage may occur. Ambient Temperature -40 to +185°F

Order No	Power Input	Description
785-001	24V/120V	Includes ignitor assembly and mounting bracket.
785-002	9V DC	Includes ignitor and reset button assembly. Battery not included.

Standing Pilot to Intermittent Retrofit Kit

Kit allows for conversion of Standing Pilot ignition systems over to Intermittant Ignition. Use with **Nat** or **LP** gas.

Includes:

- 1 - Gas Valve
- 1 - Ignition Module
- 1 - Pilot Burner Hardware
- 1 - Ignition Cable
- 1 - Wiring Harness

Order No.
Y8610U6006

Ignition Wiring Kit

Includes:

- 1 - 31" Cable
- 1 - Right Angle Boot
- 1 - Straight Boot
- 2 - 1/4" Quick Connects
- 2 - Heat Shrinks

4020 (FMDA) & 4030 (FMEA) Safety Valves

4020 Series
(FMDA)
Pilot In & Out

**This Style of
Safety Valve is
No Longer Available**

4030 Series
(FMEA)
Pilot Outlet Only

OPTIONS FOR REPLACEMENT:

- IF THE SAFETY VALVE WAS ON A PIZZA OVEN -

Option 1: *Call us* with the unit's make, model, and serial number to see if there is a retrofit kit available from the manufacturer.

Option 2: Convert the pizza oven over to use a Millivolt system. *Call us* for more details on how to properly perform this conversion.

Option 3: *Call us* for information about having the valve rebuilt.
Please Note: This option typically takes up to 6-8 weeks.

**- IF THE SAFETY VALVE WAS ON ANYTHING OTHER THAN A PIZZA OVEN,
THE ONLY OPTION IS TO HAVE THE VALVE REBUILT.**

4290 (GS) Series - Gas Snap-Action Hydraulic Control

The 4290 Series is a snap-action hydraulic thermostat used to obtain accurate temperature control by interrupting the main burner gas flow.

Commonly used with 700-881
& 700-886 Robertshaw
Bleed Valves

4290-006

Controls do not have a pilot outlet

4350-049	150 to 400°F	3/8" Pipe	A	No	36"	3/16" x 12-3/4"	Garland 1224500

† Exact replacements do not always include all accessory parts.

Warning

BJ Thermostats are VERY sensitive to changes of the calibration screw. Every notch shown around the ring represents a 25° change in temperature. Anything past a 1/4 turn (90°) in either direction will damage the thermostat and void the manufacturer's warranty. Also, rotating the rear housing requires special instruction. Please check out the "Tech Resources" section of this catalog for more information.

Flange Nipple Kit 4510 (BJFMA Series)

Narrow type with "O" rings and adaptors to convert from 1/8" pipe to a 9/16" pipe thread size.

Includes 1 each:
15/32" length
19/32" length
23/32" length

Order No.

4590-051

5300 (KX/RX) Series Millivolt Electric Thermostats

5300-403

The RX Series are millivolt direct current thermostats.

They are SPST - Break on temperature rise.

Maximum ambient temperature: 230°F (110°C)
Stem length: 13/16".

NOTE: Use of this control on alternating current (AC) will damage the switch.

Order No.	Dial Temp Range	Capillary Length	Bulb Size	Stem Flat Position	Robertshaw Model #	OEM Part No. / Comments

5225 (LCC) Series AUTOMATIC Reset Limit Controls

5225-028

The 5225 Series Automatic Reset or cycling models do not have a reset button and feature SPDT switch action. Should the temperature exceed the control's fixed setting, the normally closed (N.C.) contracts will open. At the same time the normally open (N.O.) contacts will close, and could be used to signal the over-temperature condition if so desired. Temperature must drop approximately 25°F before the normally closed contacts will reset.

Mounting Brackets: See chart at the bottom of this page.

Replacement Models - Automatic Reset

Order No.	Temp. Setting (Fixed)	Capillary Length	Bulb Size (Nickel Finish)	Stuffing Box	Mounting Bracket	Factory Model No.	OEM Part No. / Comments

5225 (LCH) Series MANUAL Reset Limit Controls

5225-112

The 5225 Series Manual reset models have a reset button and feature SPST switch action. The reset button is a trip free design, and the switch contact will reset only when the reset button is released after being depressed. Temperature must drop approximately 50°F before the switch contacts can be closed by depressing the reset button.

Mounting Brackets: See chart at the bottom of this page.

Common/ OEM Residential Cooking Top Burner Valves

4626 Series Universal Top Burner Valve

Valve has a .240" stem flat height, flat down, 2" stem (from center of inlet), 1/8" pipe inlet with needle valve and orifice hood for LP or Natural gas applications. Needle and orifice hood included.

For most LP gas applications tighten hood down against needle. For most Natural gas applications tighten hood down against needle and then back it off 1 1/4 turns. In either case, adjust hood until burner maintains a constant blue flame.

Most residential range burner valves are specific to their model. Please **call us** with your Brand, Model, and Serial numbers so we can find the valve that is right for your application!

SIT Retrofit Kits

REPLACEMENT OF OBSOLETE HONEYWELL VS8420E AND VS8421D VALVES WITH SIT RETROFIT KITS

Each kit includes (1) SIT valve, (1) piezo Ignitor, and (1) ignitor mounting bracket + screw.

For Vented Units:

Order No.	Type Gas
SITKITV-LP	LP
SITKITV-NAT	Nat

For Vent-Free Units:

Order No.	Type Gas
SITKITVF-LP	LP
SITKITVF-NAT	Nat

If you need to replace a Honeywell VS8420E or VS8421D Series gas valve, it is possible that one of our SIT kits may work as a replacement. As noted below, there are a few things to keep in mind when determining whether this retrofit will work for your application...

Is the Honeywell valve's inlet and outlet straight through?

If so, then it is likely the SIT kit will work as a replacement for your valve. ***PLEASE NOTE:** You may find that the inlet and outlet on the two valves will be **REVERSED**. If so, you will need to repipe the inlet and outlet on your unit with flex lines, as the new valve cannot be flipped around.

If the inlet and outlet on the Honeywell valve are **NOT straight-through**, it is unlikely the SIT kit will work for your application as existing brackets may block the SIT valve from being installed properly.

Does your Honeywell valve have a motorized (variable flame height) operator?

If so, the SIT kit will not work as a proper replacement unless the dual thermopile pilot and variable flame height remote are changed as well. Please call for assistance on this changeover.

F767 Hot Surface Ignitors - 110 Volt

The White-Rodgers F767 is a highly reliable ignitor because it provides a much larger surface area to ignite the gas. It can be used with either a 15, 17, or 45 second warm-up time system. All replacements have 9" leads rated at 482° (250°C).
Electrical Rating: 120v AC, 60 Hz, 5.0 amps.

41-400 Series Hot Surface Ignitors - 110 Volts

The 41-400 Series Ignitors deliver dependable ignition in heating systems; from furnaces and boilers to rooftop heaters, infrared burners, unit heaters, water heaters, and many other types of HVAC equipment. They are designed to reach ignition temperature within 17 seconds.

Ignitor Identification

In order to select the correct replacement ignitor:

1. Match the Ceramic Block Style
2. Match the Terminal Connector Style
3. See below for correct part number.

Terminal Connector Style

Ceramic Block Styles

Order No.	Factory Model	Ceramic Block	Terminal Connector	Lead Wire

Robertshaw 700 Series Manual Gas Valves

700-100 Series valves are for applications requiring a manual gas valve with an automatic safety pilot. The automatic pilot safety valve is independent from the gas cock and provides gas shutoff in case of pilot outage. These valves can be mounted in any position except upside down. Regulated and nonregulated models are available.

700-101

Order No.	Factory Model	Inlet Size (FPT)	Straight-Thru (FPT)	Side (FPT) with Plugs	Pressure Regulator	Capacity ¹ (Btu)	Includes

700-102	7000AMR	1/2"	1/2"	1/2"	Nat (3.5" WC)	100,000	(2) 1/2" x 3/8" bushings

* A separate pressure regulator may be required for the system.

¹ 1000 Btu/Cu Ft 0.64 specific gravity Natural gas (or 2500 Btu/Cu Ft 1.53 specific gravity LP gas) @ 1" WC p.d.

Robertshaw 700 Series Snap-Throttle Hydraulic Valves

700-200 Series snap-action and snap-throttle (modulating) hydraulic controls are combination gas valves, thermostatically operated by a remote temperature sensing bulb.

Temperature range 58° to 90° F
Capillary Length 36"
Bulb OD and length 1/4" x 8"
Ambient temperature -40° to 175° F
Maximum inlet pressure 14"wc (1/2 PSI)

Robertshaw 700 Series Line Voltage (120V) Combination Valves

700 Series 120V controls combine a manual gas cock, automatic pilot safety valve and silent line voltage operator. The automatic pilot valve provides gas shutoff in case of pilot outage. They can be mounted in any position except upside down.

Electrical rating 120VAC-0.34 amp, 50/60 Hz
Pressure regulator factory set @ 3.5" wc
Pilot outlet 1/4" tubing
Cover Type for conduit connection
Ambient Temperature -40° to 175° F
Lead length (std.) 32"
Maximum inlet pressure 14" W.C. (1/2 PSI)

700-452

Robertshaw 700 Series Millivolt Combination Valves

700 Series Millivolt gas valves are wall thermostat actuated combination gas valves. These controls combine a manual gas cock, automatic pilot safety valve and a millivolt operator. The automatic pilot safety is separate from the gas cock and provides gas shutoff in case of pilot outage. Regulated and nonregulated models are available. Standard features include: pilot outlet, pilot gas filter and pilot adjusting key. These valves can be mounted in any position except upside down.

Electrical rating	250 MV to 750 MV operating range
Pressure regulator (optional by model)	factory set @ 3.5" W.C.
Pilot outlet	1/4" tubing
Gas cock dial marking	Off-Pilot-On
Terminal type	1/4" spade, 3/16" spade
Ambient Temperature	-40° to 175°F

Robertshaw 722 Series Low Capacity Dual Valves

722 Series Uni-Kits are designed for intermittent pilot, direct spark or hot surface heating applications. They incorporate dual automatic valves (redundant) that are pressure regulated and come factory set at 3.5"wc for natural gas. They can be converted to LP by installing the regulator conversion kit that is included. They can be mounted in any position except upside down.

Robertshaw 1751 Pressure Regulator Kits

Add-on pressure regulators are available for 700 Series gas valves (except 700-200 Series hydraulic models which have a built-in regulator, meaning you must replace the whole valve). Kits include: gasket, mounting screws and instruction.

NOTE: Always use a new gasket and mounting screws when replacing the pressure regulator.

SV9501M8129	1/2" x 1/2"	200,000 - Nat 320,000 - LP	Nat (3.4" WC) Fast Opening	None	Includes: 393691 LP Conversion Kit
SV9502H2522	1/2" x 1/2"	200,000 - Nat 320,000 - LP	Nat (3.2" WC) Slow Opening	15 Seconds	Includes: 393691 LP Conversion Kit

Honeywell Y8610U Universal Intermittent Ignition Retrofit Kit

Kit for converting conventional standing pilot systems to intermittent pilot. For use with 24V gas-fired atmospheric furnaces, boilers, and heating applications.

Y8610U kits are for use with Natural or LP gas. Controls provide timed trial for ignition and 100% pilot gas shutoff and lockout if pilot fails to light.

Each Y8610 system includes:

- **S8610U** Intermittent Pilot Module.
- **VR8304** Intermittent Pilot Dual Combination Gas Valve with an ON-OFF manual valve, pressure regulator and two automatic main gas valve operators. Valve comes with reducer bushings.
- **393691** LP Gas Conversion Kit.
- **392431** Igniter-Sensor Assembly. Includes ceramic-insulated Kanthal rod that attaches to the existing pilot burner in place of the thermocouple.

- **394800-30** Ignition Cable. 30" (762mm) cable with connectors.
- **393690-14** Flange Assembly. Includes 3/4" straight flange with O ring. 9/64 hex screws and wrench.
- **Wiring Harness.** 30" (762mm) wiring harness with 1/4" quick-connect terminals.

Order No.	Contains		Capacity (Btu)	Inlet	Reducer Bushings	Type of Gas
	Control Module ^{A,B}	Gas Valve				
Y8610U6006	S8610U3009	VR8304M3558	270,000 - Nat 437,000 - LP	3/4" x 1/2"	(2) 3/4" x 1/2"	Nat/LP

^A With 100 percent pilot gas shutoff and lockout; 90 maximum timed trial for ignition

^B Includes automatic vent damper plug

Honeywell Gas Valve Conversion Kits

Order No.	Kit Type	Use With
391936	LP to Nat	V800, VS820, VS821, and VR8445; Standard (A or M) or Slow Opening (H).

White-Rodgers 36G & 36J Gemini Valves

The 36G and 36J Series combination valve is designed for use with non-piloted Intermittent Ignition systems. The control is designed to meet today's maximum capacity, smaller size, and high efficiency gas systems. Features include inlet and outlet pressure taps and the ability to mount in any position including upside down.

Braeburn 1220 Non-Programmable Digital Thermostats

Non-programmable digital thermostat for 24V or 750mv conventional and heat pump systems.

- 3" Bright Blue Backlit Display
- Adjustable Temperature Limits and Differential
- Separate O & B Terminals
- Permanent Memory Retains Settings
- Compressor Short-Cycle Protection

Order No.	Temp Range (°F)	Application	System Switch Positions	Fan Switch Positions
1220	45-90	24V or 750mv, Up to 2H / 2C Conventional, Heat Pumps w/ single compressor + up to 1 Auxiliary stage.	Cool-Off-Heat	Auto-On

Braeburn 2220 Programmable Digital Thermostats

Programmable digital thermostat for 24V or 750mv conventional and heat pump systems.

- 3" Bright Blue Backlit Display
- Can be set to Universal 7 Day or 5-2 Day, or Non-Programmable
- Adjustable Temperature Limits and Differential
- Permanent Memory Retains Settings

9204V	2-Wire Millivolt or 24 Volt	0.2 to 1.6 amps	Millivolt Compatible

Honeywell T87(K,N) The Round®

The Round® T87K and T87N thermostats provide electronic control of 24 Vac heating and cooling systems with the classic twist to set dial.

T87K1007

T87N1026

- Mercury Free
- Separate temperature setting and thermometer
- The T87K heat only works with 2 or 3 wire heat only systems
- The Easy-To-See™ model has enlarged scale and raised numbers and it clicks at every 2°F change

Accessories: **50010944-001** Range Stop Assembly

Order No.	Temp Range (°F)	Features
T87K1007	40-90	Heat Only
T87N1000	40-90	1 Heat/1 Cool Conventional and Heat Pumps with No Auxillary Heat
T87N1026	40-90	1 Heat/1 Cool Conventional and Heat Pumps with No Auxillary Heat EASY-TO-SEE™ Model

Be sure to call or email us if you need assistance finding the right thermostat for your application!

Honeywell Mercury-Free T822 Economy Thermostats

Provide 24 Vac control of heating or cooling systems.

Heat-Off

No Heat-Off

- Vented cover for improved temperature sensing
- Setting lever and thermometer scale on thermostat face
- Mounts directly on the wall or on vertical outlet box
- Integrated thermometer and setting scale

Switch Type: Precision Snap Action

Switching Action: SPST

Sensor Element: Bimetal

Accessories: **50019661-001** Temperature Range Stop Assembly

Order No.	Temp Range (°F)	Application	Features
T822K1000	45-90	Heat Only	Heat-Off
T822K1018	45-90	Heat Only	No Positive Off Switch

Honeywell Mercury-Free T834 Thermostat

For low voltage control of single-stage heating, cooling or heating-cooling systems.

T834N1002

- Integrated thermometer and temperature setting scale
- Precise Snap-action switch
- Mount directly on wall or outlet box

Dimensions (approx.): 4 3/4" h x 2 7/8" w x 1 3/8" d
121mm x 73mm x 35mm

Accuracy: +/- 2 F (+/- 1 C)

Current (Heating): 0.02 A to 1.0 A running

Current (Cooling): 0.02 A to 1.0 A running

Electrical Ratings: 20-30 Vac

Switch Type: Precision Snap Action

Switching Action: SPST

Sensor Element: Bimetal

Accessories: **50019661-001** Temp. Range Stop Assembly

Order No.	Application	System Switch Positions	Fan Switch Positions	Mounting	Terminal Designation
T834N1002	1 Heat / 1 Cool Conventional and Heat Pump with no Auxillary Heat	Heat-Off-Cool	Auto-On	Vertical	R,Rc,W,Y,G,O,B

Honeywell Mercury-Free T827 Thermostat

Provides control of 750 mV or 12 Vdc heating systems.

T827K1009

- Rated for 12 Vdc and millivoltage systems
- Coiled bimetal element operates snap-acting switch
- Temperature setting lever on bottom of thermostat
- Temperature setting and thermometer scale on cover

Dimensions (approx.): 4 3/4" h x 2 7/8" w x 1 3/8" d
121mm x 73mm x 35mm

Voltage: 12 Vdc or 750 mV

Accuracy: +/- 2 F (+/- 1 C)

Switch Type: Precision Snap Action

Switching Action: SPST

Sensor Element: Bimetal

Accessories: **50019661-001** Temp. Range Stop Assembly

Order No.	Application	System Switch Positions	Mounting	Terminal Designation
T827K1009	Heat Only	Heat - Off	Vertical	R,W

Robertshaw 802 Line Voltage Thermostat

Single-stage heating only thermostat for use with 120V, 240V, or 277V systems.

802

- Mercury-Free
- Has Positive Off
- J-Box Compatible

Order No.	Temp Range (°F)	Application	Positive Off
802	50-90	120V, 240V, 277V, Heat Only	Yes

Thermostat Wire

Order No.	Wires	Roll Length
TH2PP-500	2	500 Ft
TH5PP-250	5	250 Ft

Be sure to check out the **“Installation / Test Equipment / Tools”** section of this catalog for many more useful service materials and tools.

Water Heater Parts

*** Water Heater Gas Valves, Thermostats, & Burners ***

Most modern water heater gas valves, thermostats, and burner assemblies are made specifically for the unit they go on. Please **call us** with your unit's Brand, Model, and Serial number so we can find the correct part for your water heater.

MAX13A15	325-3 Series
MAX13A15-5	325-5 Series
MAX13A25	325-7 & 325-9 Series

PLEASE NOTE:

When using a vent limiter or vent protector, the regulator **MUST** be mounted in a horizontal upright position.

MAXICAP Vent Covers

Weatherproof vent covers that fit 325 Series regulators.

MAXICAP-3

Order No.	Used On
MAXICAP-3	325-3 Series
MAXICAP-5	325-5 Series
MAXICAP-7	325-7 Series

MAXIVENT

Weatherproof vent for external relief when piped to the outdoors.

MAXIVENT-3/4F

Order No.	Description
MAXIVENT-3/4F	3/4" Female

Equimeter Final Stage Service Regulators

EQ143-80-2-1
EQ143-80-2-1 1/4
EQ143-80-2-3/4

EQ243-12-2
EQ243-8-2-1 1/2

- These service regulators have an internal relief valve installed for final stage usage.
- Can be mounted in any position except upside down via rotating flange inlet/outlet.
- Spring and orifice should be sized according to BTU demand.
- Maximum inlet pressure is 125 PSI *with the appropriate orifice*. Maximum inlet pressures for the orifices that are installed by default are listed below.

Order No.	Pipe Size	Inlet Pressure	Outlet Pressure (Inches WC)	2PSI Maximum BTU Capacity	5PSI Maximum BTU Capacity	10PSI Maximum BTU Capacity	Comments
EQ143-80-2-3/4	3/4"	Up to 60 psi	6"-14"	530,000	700,000	950,000	Has 1/4" orifice installed from the manufacturer
EQ143-80-2-1	1"	Up to 40 psi	6"-14"	840,000	1,160,000	1,330,000	Has 3/8" orifice installed from the manufacturer
EQ143-80-2-1 1/4	1-1/4"	Up to 20 psi	6"-14"	1,020,000	1,490,000	1,800,000	Has 1/2" orifice installed from the manufacturer
EQ243-8-2-1 1/2	1-1/2"	Up to 40 psi	6"-14"	2,000,000	3,800,000	5,400,000	Has 3/4" orifice installed from the manufacturer
EQ243-12-2	2"	Up to 60 psi	6"-14"	3,400,000	6,900,000	9,200,000	Has 3/4" orifice installed from the manufacturer
PLEASE NOTE: These regulators are stocked for the above settings. The spring range and orifice may be changed according to your specific needs.							

4600 Series Convertable (1/2 PSI) Regulators

The primary advantage of these regulators are their easy conversion feature. The 4600S0001 can be converted from Natural to LP by flipping the pin located underneath the screw-off cap, while the 4600S0004 simply needs the cap itself to be flipped over for conversion.

4600S0001

4600S0004

Order No.	Pipe Size	Maximum Inlet Pressure (PSI)	Outlet Pressure	BTU/hr
4600S0001	1/2"	1/2 PSI	LP - 10" Fixed Nat - 4" Fixed	150 to 200,000
4600S0004	3/4"	1/2 PSI

DORMONT Gas Connectors & Accessories

Note: If your appliance is on casters and can be moved OR is located on a food truck, then the BP series hose is required by code.

N-Series Stainless Steel (Non-Coated)

These connectors are specially designed for range, dryer, and heater applications. The 3/4" and larger connectors are for mobile home use and stationary, non-castered food service equipment.

Available in the following lengths.
Please specify.

SSC1625, 1637, & 1650:

12", 18", 24", 36", 60", 72"

SSC1675:

24" 36", 48", 60", 72"

T4-KIT-18	1/4"	18"
T4-KIT-24	1/4"	24"
T4-KIT-30	1/4"	30"

Aluminum Tubing

Our aluminum tubing comes in a 50 ft roll. It is also available by the foot. If ordering more than a few feet, it is recommended to purchase the whole roll as it will be more economical.

Order No.	Tubing Size (O.D.)
AT-1/8	1/8"
AT-3/16	3/16"
AT-1/4	1/4"
AT-5/16	5/16"
AT-3/8	3/8"
AT-7/16	7/16"
AT-1/2	1/2"

Tubing Cutters

Jasco

Order No.	Size
JASCO MODEL 200	Cuts 1/8" to 1-1/8" tubing

Rothenberger

Order No.	Size
ROT70010	Cuts 1/8" to 1-1/8" tubing
ROT70007	Replacement cutter wheel

Uniweld Mini Cutter

Order No.	Size
UNI70000	Cuts 1/8" to 7/8" tubing

Tubing Bender

Uniweld

Order No.	Tubing Sizes
UNI70015	3-in-1 Model 1/4", 5/16", 3/8"

Rothenberger

Order No.	Flare Sizes
ROT26033	3/16", 1/4", 5/16", 3/8", 1/2", 5/8"

Flaring Tools

Uniweld

UNI70071

UNI70003

Order No.	Flare Sizes
UNI70071	Deluxe Model 3/16", 1/4", 5/16", 3/8", 7/16", 1/2", 5/8", 3/4"
UNI70003	3/16", 1/4", 5/16", 3/8", 7/16", 1/2", 5/8"

Drill Kits

All drill kits come in a durable plastic case.

Order No.	Drill Sizes In Kit
GDK4080	40-80
GDK1939	19-39
GDK1960	19-60
Replacement drills are available. Please call and specify drill size needed.	

Pilot Orifice Broaches

Tube of 12 broaches.

Order No.
12-414

Orifice Reamers

5-cornered orifice reamers are available in the following sizes:
30, 40, 45, 50, 55, 60, 65, 70, 75, and 80

Order No.
RE-*
*Please specify size needed after the "RE-".

Pin Vise

Designed to accommodate any of our orifice drills

Order No.
PV-1

Pocket Pin Vise

Order No.	Drill Sizes In Kit
PPV	Pocket Pin Vise
PPV-12	Pocket Pin Vise + 12 Pilot Orifice Broaches

Orifice Spudding (Re-Drilling) Materials

Insert Orifice

Used to spud and re-drill burner orifices. Commonly used in converting an orifice from Natural to LP, as LP requires a smaller orifice hole.

Order No.
MI-100

Crimping Tool

Order No.
TL-062

Large Reamer

Order No.
TL-070

Orifice Spud & Re-Drill Kit

Used to spud & re-drill existing orifices. Includes 25 Insert Orifices, Reamers, Large Reamer, Crimping Tool, Pin Vise, and a sturdy Plastic Box.

Order No.
AK-1

TECH NOTE: The Orifice Capacities Chart in the "Tech Resources" section of this catalog will help in determining the correct orifice drill size needed.

Test Equipment

Gas Leak Detector

Detects combustible gases. Tick rate can be nullified to eliminate background gas concentration and pinpoint leak sources.

Order No.

TPI725L

Deluxe Gas Leak Detector

Emits a ticking signal which increases in frequency as the source of the leak is approached. Pinpoints leaks as small as 50-1000 PPM. LED indicator lights display the size of the leak. External on/off switch.

Order No.	Description
TIF-8900-120	Detector w/ 120V Charger
TIF-8801	Sensing Tip
TIF-8803	120V Charger
TIF-8805	12V Charger
TIF-8806A	Battery Set (2 per pack)

High Pressure Test Kit

High pressure test kit with carrying case. Used for high pressure leak tests. (Example: on an "out of gas" call).

Maximum Pressure: 300 PSI.

Order No.

HPTK

2 PSI Test Kit

2 PSI test kit with carrying case. Used for high pressure leak tests.

Maximum Pressure: 2 PSI.

Order No.

2PSI-TK

Low Pressure (1/2 PSI) Test Kit

Precision test instrument for accurate setting of manifold pressure. Calibrated inches of water column: 0-35".

Maximum Pressure: 1/2 PSI.

Order No.

TIF-42160

Magnehelic Gauge Kit

Special test apparatus used for leak tests, and measuring the flow and lockup of regulators. Can be used on a negative scale.

Maximum Pressure: 1/2 PSI

Order No.

Description

MGK-1

Magnehelic Gauge w/ Carry Case

MGK-BOX

Replacement Carry Case

MGK-CLEAR HOSE

Replacement 30" Hose w/ Boot

Test Equipment (Continued)

Digital Manometer Kits

Single Pressure Digital Manometer

Designed especially for the HVAC contractor, it can be used to set gas supply pressures, verify pressure switch operation, adjust regulators, check pneumatic systems and computer peripherals.

- -20 to 20" WC Range
- $\pm 1.5\%$ Full Scale Accuracy
- 5 PSI Maximum Pressure
- Electronic Zeroing
- 4 Digit LCD Display
- Extruded Aluminum Case
- 9V Battery Operation

Kit Includes:

- 1 - Manometer
- 1 - Rubber Boot
- 1 - Special Hose Barb
- 1 - Serviceman's Friend Adaptor
- 1 - 30" Clear Hose w/ Straight Boot
- 1 - Carrying Bag

Order No.

DW476A-0-KIT

Dual Pressure Digital Manometer

Used to measure positive, negative, or differential pressures.

- -55.4 to 55.4" WC Range
- 3% Full Scale Accuracy
- 10 PSI Maximum Pressure
- Electronic Zeroing
- Hold/Freeze Button
- LCD Display
- Two Barbed Connections for use with 1/8" or 3/16" ID Tubing
- 9V Battery Operation
- Select from 11 common Pressure Units

Kit Includes:

- 1 - Manometer
- 1 - Serviceman's Friend
- 2 - 6" 1/8" ID Clear Hose
- 2 - 6" 3/16" ID Clear Hose
- 1 - Carrying Bag

Order No.

LDPM-01

Water Manometers

Water Manometer Kit

Measures 16" WC (8"-0-8"). Portable or stationary use. Magnetic clips and clamp bar included.

Kit Includes:

- 1 - Water Manometer
- 2 - Hose Adaptors
- 1 - Clear Hose
- 1 - Bottle of Dye

Order No.

DW1223-16

Replacement Manometer Fluid

3/4 Fl Oz Bottle

Order No.

Color

DW-A-101

Red

DW-A-126

Green

Manometer Adaptor

Inline adaptor for copper tube lines.

Order No.

Description

GMMA-3/8

3/8" F Flare X 3/8" M Flare

GMMA-1/2

1/2" F Flare X 1/2" M Flare

GMMA-5/8

5/8" F Flare X 5/8" M Flare

Test Equipment (Continued)

UEI Digital Multimeter

The UTL33T offers a wide variety of user-friendly features and functions needed to help technicians successfully troubleshoot, repair and verify appliance operation.

- AC & DC Voltage
- DC Current
- Temperature
- Diode & Continuity Resistance (Ohms)
- Transistor Test
- Audible Continuity Alert

Included:

- Multimeter
- Test Lead Set (ATL55)
- Temperature Probe
- Battery (9V)
- Zippered Bag

Order No.

UTL33T

UEI Clamp-On Digital Multimeter

The DL479B is geared towards the HVAC service technician, offering 600A AC, temperature, capacitance, and frequency.

- True RMS
- AC & DC Voltage
- DC Current
- Temperature
- Diode & Continuity Resistance (Ohms)
- Audible Continuity Alert

Included:

- Multimeter
- Test leads, w/ alligator clips
- Temperature probe (ATT71)
- Zippered pouch
- Batteries 2 (AAA)

Order No.

DL479B

TPI One-Touch Multimeter

The new TPI 100 automatically switches between AC and DC Voltage, as well as Ohm resistance measurements.

- Single Button Operation w/ Auto Power-Off
- Automatic Switching between AC Volts, DC Volts, and Ohms
- Protective Rubber Casing

Included:

- Multimeter
- Test Lead Set
- Batteries

Order No.

TPI100EZDMM

Thermocouple Tester

Test thermocouple voltage with this screw-in adaptor. Standard thread.

Add **SNA-6** for metric usage

(Not Included)

Order No.

392451-1

Alligator Clips

Set of 2 w/ high temp rubber boots.

Order No.

AAC

Common Service Accessories

Rust Buster®

A chemical penetrant which instantly loosens rusted bolts, screws, shafts, piping, and all types of "frozen" connections.
(4 fl ozs. / 14" telescoping spout)

Order No.
17-075

Zoom Spout® Oiler

A high grade turbine oil lubricant, perfect for those hard to reach spots.
(4 fl ozs. / 14" telescoping spout)

Order No.
17-076

Valve Grease

Specially compounded to provide excellent lubrication at temperatures ranging from 32°-175°F. It will not become runny at high temps and remains pliable at low temps.

Order No.	Description
Y70AA-1C	1 Tube (2.5 oz)
Y70AA-2C	12 Tubes (Carton)

Leak Detector

Low Temp for use above and below freezing.
(Not for oxygen)

Order No.	Description
LD-1	1 Gallon
LD-4	Case of 4 Gallons

Dispensers

PSC-1

PSB-1

Order No.	Description
PSC-1	Plastic Container w/ Brush
PSB-1	Plastic Spray Bottle

Smoke Matches

For testing smoke alarms, flues, and ducts.
Packed 20 to a box.

Order No.
SM-1

Slic-Tite® Pipe Dope

Heavy-duty pipe thread sealing paste.
Non-toxic. White.

Order No.	Description
ST-1/4	1/4 Pint - Brush in Cap
ST-1/2	1/2 Pint - Brush in Cap

Teflon Tape

Provides a seal on any pipe or fitting.
(1/2" X 520")

Order No.
TT-1

Pipetite Stik®

Pipe joint sealing compound.

Order No.	Description
PS-1	1 Stick
PS-12	12 Sticks

Common Service Accessories (Continued)

Compressed Air

10 oz can

Order No.

COMP AIR

Fyr-Styk™ Match Holder

For use lighting furnaces, heaters, and grills.
Extends over 2 ft.

Order No.

ML-1

Pocket Telescoping Rod Kit

Includes match holder clip, mirror, and magnet attachments as well as a PVC carrying pouch. Extends over 2 ft.

Order No.

IMK3

Wrenches

Order No.

Description

WR1124

3/8" Thermocouple Wrench

WR1128

7/16" Orifice Wrench

Serviceman's Friend

Fitting has 1/8" pipe thread and special 5/16" x 32 thread. Opposite end has regular hose fitting and 1/8" pipe thread.

Order No.

SF-1

Special Hose Barb

1/4" hose barb can be used with an allen wrench.

Order No.

SHB-1

Pig Cooker Thermometer

3" Dial. 4" Stem.
Range - 50-550°F

Order No.

B3B4-RR

Oven Thermometer

Stainless steel case that hangs or stands.
2" diameter dial with readings in F° and C°
Range - 200-550°F (90-290°C)

Order No.

OT-103

Gauges

DAJA221A

Order No.	Description
DAJA220A	0-15"WC

Pipe & Tubing Diameters

Actual Outside Diameters of Pipe Threads

Actual Outside Diameters of Tubing

Please Note:

We sell our tubing by the 50' roll or by the foot. If you need more than a few feet, it is more economical to buy a whole 50' roll.

Tech Tip: You must use Teflon Tape or Pipe Dope to seal any pipe connections you make. Compression (tubing) fittings do not require any sealant. Be sure to visit the **"Installation / Test Equipment / Tools"** section of this catalog for pipe sealant and many other useful service materials.

Troubleshooting Residential Oven Safety Valves & Ignitors

Gas Range - Hot Surface Ignition Operation and Troubleshooting

IGNITOR SYSTEM OPERATION

The hot surface ignition system in gas ranges has three main components: 1) The thermostat, or an electronic range control, 2) The hot surface ignitor, and 3) The bimetal gas oven safety valve. Other items such as fuses, timers, contactors, door switches, etc. may be included in the circuit, but the three basic components remain the same.

In a typical bake system, the thermostat, ignitor and valve are wired in series. Some applications use a single thermostat, a selector switch (bake and broil), two ignitors and a "dual" bimetal valve. This is usually a series-parallel circuit, and when troubleshooting, each circuit must be checked individually. When the thermostat is set at a selected temperature, the contacts close and supply power to the circuit. With power applied, the ignitor begins to heat and glow in a few seconds.

The electrical resistance of the ignitor will decrease as the surface temperature of the ignitor increases. The current flowing in the circuit increases in proportion to the drop in ignitor resistance. Current flows through the heater coil of the valve causing the bimetal arm to flex, opening the valve and allowing gas to flow to the burner where it is ignited by the glowing ignitor. The rising current flow in the circuit raises the amount of heat produced by the heater coil. The bimetal arm in the valve will reach a flexing temperature and open the valve when the current flow approaches its peak which is 3.2 to 3.6 amps with the flat NORTON ignitors, and 2.5 to 3.0 amps with the round CARBORUNDUM ignitors.

The surface temperature of the ignitor is approximately 2500°F by the time the bimetal valve opens. The gas flows out of the valve into the burner and ignition occurs. The ignitor will remain energized at all times when the burner is lit. When the oven reaches the selected temperature, the thermostat contacts open and remove power from the ignitor/valve circuit. With power removed, the heater coil and bimetal arm will cool and the valve will close in a few seconds extinguishing the burner flame.

IGNITOR DOES NOT GLOW

1. Disconnect or remove ignitor and measure its resistance. Cold resistance should be between 50 and 150 OHMS. (The value of the resistance is not important as long as the ignitor is not open or shorted.)
2. Check internal fuses, switches and 120 VAC power supply.
3. If power is working -
 - A. Disconnect oven power and remove wires at "B" and "C".
 - 1) Check continuity between wire "B" and terminal "C". If continuity is present go to Step 4.
 - B. If continuity is NOT present - remove wire at "D" and probe terminals "D" and "C" for continuity. If NO continuity - replace bimetal valve.
 - C. If continuity is present at "D" and "C" - probe wires "B" and "D". If NO continuity - replace the ignitor.
4. If continuity is present in step 3.A.1 - Check thermostat.
 - A. Make sure the oven is not heated. Turn power off, disconnect wiring and turn thermostat dial to 350°F. Probe at terminals "A" and "B". If NO continuity - replace the oven thermostat.

IGNITOR GLOWS WITH NO IGNITION

1. Check that gas is turned on to the range.
2. Check ampere draw at bimetal valve. Power on. Thermostat set at 350°F.
 - A. Using wrap-around amp. meter - test one leg for amp. draw at "D" or "C".
 - 1) NORTON (flat) Ignitor - 3.2 to 3.6 amps. or 2.94 to 3.3 volts.
 - 2) CARBORUNDUM (round) Ignitor* - 2.5 to 3.0 amps. or 3.3 to 4.0 volts.
 If amp. or voltage draw is **NOT** within proper range - replace the ignitor.
 - B. If correct amp. draw is present - replace the valve.

For safety purposes, when measuring the current flow through the ignitor circuit, shut off the main or the oven gas shut-off valve.

* Norton (flat) ignitor with "powder-blue" ceramic body has Carborundum value of 2.5 to 3.0 amps.

CAUTION: Premature failure of ignitor can be caused by over-gassed safety valve orifice or defective burner. If ignitor is located in the flame, premature failure will occur. It is important to check its location when installing a replacement ignitor.

Troubleshooting Dryer Coils

⚠ WARNING

To reduce the risk of electric shock, fire, explosion, serious injury, or death:

- Disconnect electric power to the dryer before servicing.
- Close gas shut-off valve to gas dryer before servicing.
- Never start the dryer with any guards or panels removed.
- Whenever ground wires are removed during servicing, these ground wires must be reconnected to ensure that the dryer is properly grounded.

Gas Valve Coil Test:

- Refer to appropriate Service Manual and gain access to the gas valve.
- Remove disconnect blocks from gas valve coils.
- Set test meter to read Ohms and put meter probes to terminals as follows, Figure 1 and 2:

	60 Hertz
Holding Coil Terminals 1 and 2	1365 ± 25 Ohms
Booster Coil Terminals 1 and 3	560 ± 25 Ohms
Secondary Coil Terminals 4 and 5	1220 ± 50 Ohms

Figure 1

Figure 2

NOTE: If meter registers readings different from those listed, the respective coil(s) should be replaced.

Flame Sensor Test:

- Refer to appropriate Service Manual and gain access to the flame sensor.
- Remove wires from sensor terminals.
- Set test meter to read Ohms and put meter probes on sensor terminals. *Meter should read "zero" Ohms.* If meter registers an Ohm reading of any amount, replace sensor.

Igniter Test:

- Refer to appropriate Service Manual and gain access to the igniter.
- Disconnect igniter wires at disconnect block.
- Set test meter to read Ohms and put meter probes on terminals of igniter wires. *Meter should read between 75-800 Ohms.* If meter does not read between 75-800 Ohms, replace igniter.

NOTE: If the gas valve coils, the flame sensor, and the igniter all check okay in the non-energized state, then proceed as follows:

- Refer to wiring diagram and make sure gas valve is wired correctly.
- Make sure all pins are locked into connectors and that all wires are connected securely.
- Reconnect electric power to the dryer and start dryer in a heat setting.
- Observe at least two complete ignition and burn cycles.
- Reinstall lower access panel.

"BJ" Series Thermostat Housing Rotation & Calibration

1. Remove pilot fitting if installed on control.
2. Remove 4 hex head bolts on rear of control while applying pressure to hold the rear housing against the main control body housing.
3. Re-calibration of the control is required after rotating the rear housing 1/4 turn (90°) to the right or left. Re-calibration is NOT necessary if turning the rear housing 1/2 turn (180°).
4. To re-calibrate the control, view the control from the front. Using a screwdriver, push in the calibration screw in the center of the gas cock plug. Turn this screw 1/4 turn (90°) in the same direction as the housing was rotated as viewed from the front of the control. (See illustration above for reference)

CAUTION

NEVER turn the calibration screw more than 1/4 turn (90°) as this will damage the thermostat beyond repair and void the manufacturer warranty. Each notch around the calibration screw represents a +/- 25°F change. Each 1/4" turn will change the temperature setting approximately 225°!!!

5. To rotate the rear housing 180°, pull the rear housing apart from the body so they are completely separated. Rotate it 180°. DO NOT let the "t-bar" in the rear housing be in contact with the body while rotating. Once 180° rotation is complete, carefully work "t-bar" back into the body.
6. Replace and tighten the 4 hex head bolts.

"BJ" Series Thermostat Bypass (Minimum Flame) Adjustment

1. Turn bypass screw clockwise, all the way closed.
2. Turn thermostat to 300°F. When the temperature reaches 300°F, the flame should cut off (assuming the thermostat has been calibrated correctly).
 - **WARNING:** These controls have been carefully calibrated at the factory and should NOT require field calibration. However, it DOES require field adjustment for bypass (minimum) burner flame screw.
3. When the temperature reaches 300°F and the flame has gone out, turn bypass screw counter-clockwise until a small flame forms completely around the burner.
 - **NOTE:** The flame MUST be large enough so that it will not flash back into the venturi, and is small (low) enough that the temperature will not increase.
4. Turn the thermostat temperature up to 350°F. When the temperature reaches 350°F, the flame must go back to the low flame setting that you previously set.
5. Turn the thermostat to 300°F. Flame should stay the same size as it was at 350°F. If it does not, make the necessary adjustments.
